After much research into the telecommunications market we are excited to be able to offer you fantastic value on fixed line, long distance and mobile services.

How can we do this? Through the world's largest Networked Telecommunications Company that has a solid 13 year history operating in 18 countries throughout the world, with a growth rate in excess of 45% per annum.

The company is ACN and they launched in Australia in Nov. 2004

We have used these services for over 3 years now and we cannot believe the savings we have made.

ACN pride them selves on exceptional customer service, which is very important to us, so we are taking this opportunity to share this information with you.

If you ask yourself----

## Supre Hard Surface Cleaner

### SUPRE Hard surface Cleaner

Supre is a user friendly and environmentally friendly power house. It contains no harsh caustic alkalies, no acids, no abrasives, no hydrocarbons or chlorinated hydrocarbon solvents. Therefore Supre is much safer to use as it does not burn the skin, will not scratch or abrade surfaces, is harmless to the Ozone layer and is non flammable.

The product contains no phosphates or nitrates so does not harm the waterways. It contains only naturally based surfactants so biodegrades quickly.

How then does Supre work so effectively?

It contains Orange & Pine oils to increase penetration of greasy soils which then allows oil based soils to solubilise into water faster and then to be simply washed away.

Supre comes in a concentrated form and so different dilution formulas allow for multi purpose cleaning applications.

Supre is great for cleaning grime of lino, cleans soap scum of showers, good for bbq plates, general spray and wipe situations. It has also been used for
